Product Design Engineer with 6+ years of experience delivering user-centred products from ideation through production.

Experience

Senior Product Designer, Beacon Biosignals Jan 2026 — Present

Product Designer III, Aug 2024 — Dec 2025

Product Designer II, Jul 2023 — Jul 2024

- Lead product designer on Beacon's clinician web portal, and patient mobile application teams, working cross-functionally to deliver user-driven clinical and diagnostic services.
- Designing Beacon's next generation of wearable, FDA 510(k)-cleared EEG devices for use in clinical trials and diagnostics of central nervous system disorders.
- Developing comprehensive patient journey for first-of-a-kind home sleep diagnostic EEG test used by over 12,000 patients each month.
- Increasing clinical study observability by leveraging intimate knowledge of neuroscience paired with beautiful design to deliver high touchpoint clinical trial data analytics dashboards and suites for customers and clinical operations.
- Working hand-in-hand with neuroscientists and neurologists to develop the world's AI neurobiomarker identification platform accelerating clinical trials powering new treatments for patients with neurological and psychiatric diseases.

Front End Engineer, Beacon Biosignals Jan 2021 — Aug 2022, *internship*

- Developed a next generation AI-powered interface used by neurologists to diagnose illness based on EEGs (brainwaves).
- Architected DSP over TCP brain signal streaming infrastructure, decreasing streaming latency by 1000%.
- Leveraged knowledge of web accessibility to design, architect, build and design Beacon's cross-platform component library.

Product Designer, Float Card Jan 2021 — Aug 2022

- Led comprehensive design process introducing a cradle-to-the-grave product lifecycle.
- Developed standard operating procedures for product design to development handoff.
- Designed and developed user interface component library for Float.
- Worked closely with stakeholders to define new UX guidelines concerning virtual credit cards and expenses.
- Designed In-product artwork, illustrations, and core features.

UX/UI Developer, PUMA Utilities May 2020 — Aug 2020, *internship*

- Designed UX studies evaluating mental models of data validation process used for experience-based interface redesign.
- Created PUMA's global design system, establishing modern color palettes and a beautiful data-driven product look and feel.
- Prototyped and developed component-based front-end infrastructure to increase product scalability.

Software Developer, Hootsuite Sept 2019 — Dec 2019, *internship*

- Collaborated with design, product and Dev Ops team to ship robust code used by over 18 million people.
- Implemented a front-end calendar service redesign in React to meet marketing needs of Hootsuite's global clients.
- Led initiative backed by 130 developers to create W3CAA accessibility implementation strategy including CI integration.

Skills

- 7+ years of experience in Figma, generating and maintaining wireframes, high-fidelity designs, shared design systems, including branding and design guidelines.
- Mobile and web application design, including design for connected IoT devices and Bluetooth.
- Rapid prototyping, agile development, continuous deployment, and iterative design.
- Engineering design for regulated fields including FDA SaMD and ISO 13485 and ISO 14971.
- Summative and formative user testing, systems optimization, statistical modelling, data-driven decision-making and quantitative analysis.
- Digital and physical interface design and ergonomics.
- AI-driven design practices including prompt generation and Claude Code rapid prototyping.
- Parametric CAD software: SolidWorks and Autodesk Fusion.
- Adobe Creative Cloud (Illustrator, Photoshop).
- Software development in React, Typescript, JavaScript, Python, C/C++, SQL, relational databases.

Education

Hnrs. Systems Design Engineering The University of Waterloo, Class of 2023

Minoring with distinction in computing — neuroscience & machine learning

Areas of Study: Machine intelligence, neuroscience, neurobiological system modelling UX design, complex systems modelling & analysis, prototyping and quantitative design patterns, HCI design, signal processing, system optimization, pattern recognition, human statistics design patterns.
